*Spray for instant relief*

## Cold sore/Rash/pimples

I had a cold sore on my top lip and so I sprayed my lip several times that day with BodyGuard and I continued to do it for the next two days and within those three days of using the BodyGuard my lip was no longer swollen and the cold sore was non-existent.

## An Awesome Product

To Whom It May Concern

We have been using BodyGuard for several years now, and it has become one of our must-have-near-at-hand products at all times.

Why? BodyGuard has proven itself a Godsend so many times. A sore throat? Spray it straight into the mouth. Sticky or Itchy ear? Spray it deep into the ear canal – this little procedure has helped Jayne so many times. Wake up in the middle of the night with a scratchy throat, which happens often enough to Allan, and don't want to traipse out to the kitchen to hit the lemon and honey? Simple, a few sprays down the gullet, and roll straight back under the cosy covers.

Hayfever? Sinus infection? Spray it into each nostril and breathe the mist in. Allan resorts to this for his allergic rhinitis the year round, with welcome relief.

Tinea driving you crazy? Spray those toes and avoid the throes. Conjunctivitis? We both get significant relief within a couple of days, which the chemist cannot compete with. Cut yourself? Immediately, or later if you can't, spray the open wound to accelerate healing. Spray BodyGuard onto the pad of the bandaid, and your cut will thank you for it. When Allan gets a bleeding gum, he squirts the area with this wonder spray. There's one in the glove box, there's one each on our bedside tables, there's one in the kitchen, there's one in the bathroom and there's one each in our travel toilet bags.

This is not an exhaustive list by any means of how BodyGuard has helped us. Buy extra, because if you have a kind heart, there will be friends in need who you will want to give it to. And it's made here in Western Australia, to boot!

There really must me a streak of curative genius in this stuff, and, frankly, we don't think the pharmaceutical industry would be too happy about such an inexpensive help-meet outperforming so many of their wares, and without troubling side-effects.

## Spray for instant relief

Silver ions are increasingly being recognized for their broad-spectrum antimicrobial qualities and bandages impregnated with silver ions are especially in demand because they prevent bacterial growth and therefore speed healing time, making them extremely valuable for treating burn and wound victims.

Today, consumer healthcare companies like Johnson & Johnson and others offer their own lines of band aids and dressings that use silver ions as an active ingredient to accelerate wound healing.

Silver Ions have actually been proven to promote the growth of new cells, thereby increasing the rate at which wounds heal.

The fact that silver ions are effective against a very broad range of bacteria is well established and due to recent advances in the delivery of silver ions, they are being used in a rapidly growing range of dietary-supplement, wound care, medical and industrial products and when combined with singlet oxygen this effect is dramatically multiplied.

### **Athletes Foot**

12th July 2003

Hello,

I have recently used a bottle of BodyGuard spray on my feet to see if it would cure the athletes' foot, I have had for several years from constant training in shoes.

I had tried many remedies, both natural and pharmaceutical, but none of them worked for any period of time. Until I tried your BodyGuard! I sprayed thoroughly every day (2-3 times) and let it dry completely. After a week or two, I found that my athletes' foot had completely cleared up. I continued for another week then stopped to see what would happen – to my delight it did not reappear.

Before BodyGuard, I could not wear high heels or open sandals, but now I can feel confident.

Thank you for a wonderful product.

Rebekah D Safety Bay, Western Australia

### **Acne**

My son started to get the dreaded teenage acne on his cheeks. After using another product without much success, I was told to try BodyGuard. The results were fantastic. My son's skin is greatly improved – thank you very much.

K.P. Shoalwater, Western Australia

### **Conjunctivitis**

I have suffered with chronic and recurring conjunctivitis for many years.

I still find it hard to believe that spraying my eyes with your BodyGuard completely cleared it up AND it has not returned.

Thanks for an outstanding product.

D.J. Perth W.A.

### **Mouth Ulcer**

I wish to bring to your attention, my appreciation of the effectiveness of one of your products BodyGuard.

I have been using BodyGuard for at least 3 months. I have even used it on a mouth ulcer and it worked extremely well.

Keep up the good work.

Yours in Health

M Simpson

### **Rash**

Sometimes at night, the scratching would be so bad, that there was not much hope of sleep for more than a couple of hours.

I tried the Bodyguard one night, and to my amazement, the desire to scratch just vanished.

It has worked every time and rescues me from endless scratching and irritation.

Graham W Ellenbrook, Western Australia

### **Sunburn**

I have just used your BodyGuard to treat my badly sunburnt shoulders after a lovely Australia Day long weekend in the sun. I sprayed several times over a 24 hour period. The relief was almost instant and I did not even peel. Thanks for saving my very fair skin from blistering and peeling.

D.D Joondalup, Western Australia

### **Infected Wound**

My friend Cameron had been surfing in Sri Lanka for 7 weeks. He got a wound on his shin 3 weeks before arriving home. Upon arriving back

in Australia his wound was very painful - over the following week it became infected and the wound doubled in size. He spent a week in hospital after several attempts of different antibiotics. He was told he may lose the leg and he was most definitely going to need plastic surgery. I gave Cameron some BodyGuard and Ionic Silver and after 48 hours there was a marked improvement. He no longer needs plastic surgery, and won't be losing his leg.

We are both understandably wrapped with the results – thank you.

### **Wasp Stings**

After being stung several times by wasps on my face, I experienced intense pain. I instinctively sprayed my face with BodyGuard and within seconds all pain had disappeared, leaving no noticeable marks or swelling.

I am very grateful to the manufacturer of BodyGuard. This is another example of the versatility of this product in relation to personal hygiene and protection.

Ann Orton Swan View

### **White Tail Spider Bite**

I am more than happy to state that following a bite on my right forearm from a white tail spider, use of BodyGuard sprayed on 3-4 times a day has completely eliminated all symptoms and the area is fully healed.

M. Lindberg Benger W.A

### **Healing for Horses**

I am a Manipulative Therapist and Natural Therapist, dealing with horses and dogs on a daily basis.

I received a sample of BodyGuard, which I used on a colt with major post-operative trauma. The site of the operation had developed an infection-causing skin to slough off leaving exposed flesh.

We sprayed BodyGuard directly onto the wound morning and night. The healing process from that time on was amazing. The colt has almost fully recovered with hardly a noticeable mark on him.

I am now buying and recommending BodyGuard to my many clients.
